

Conference Brief

The 3rd Chitwan International Conference focuses on Paediatric Emergency Medicine. The Theme for the Conference is – “Challenges to Solutions: Acting Right in Testing Times”

This one-day conference aims to provide basic understanding of timely interventions and management of ongoing common problems encountered in paediatric emergency while unfolding existing information about the paediatric emergency care services customary to Nepal, UK and India.

The Conference Speakers will provide detailed insights on the updated management of common paediatric problems.

We aim that this educational and interactive program will be of great benefit to the practising Physicians, Post Graduate Students, Medical Officers, Interns, Nursing Staffs and other health care professionals.
